

SANLORENZO

30 May 2011

To Whom It May Concern,

For the last three years Francesco Mendicino, with the Arredamenti Porto Company, has been the Project Manager for three consecutive new builds at the Sanlorenzo shipyard in Viareggio, Italy.

He has followed the build of three steel hulled yachts; the 44 meter M/Y Lammouche, 46 meter M/Y Carol and the soon to be launched 46 meter M/Y Reve D'Or. While working with our Sanlorenzo team he has demonstrated his ability to constantly keep all the projects on schedule and within their budgets.

Because of his considerable knowledge of building yachts and his great organizational skills, Francesco has managed to produce three great interiors in a relatively short amount of time.

He has been involved in all of the subcontractor/shipyard meetings here on a weekly basis to make sure that all the projects were carried out according to the designs and was always present to help make any necessary adjustments to make the drawings fit the yacht structure.

Sincerely,

Ing. Stefano Porcini

Technical Department Chief
